

**Sec. 29-349-153. Lights in magazines**

Magazines in manufacturing areas may be provided with artificial lighting only if such lighting system complies with the applicable requirements of Articles 500 through 503 of the National Electrical Code consistent with the hazards present in the magazines. No other magazines shall be provided with artificial light, except that if artificial lights are necessary only electric safety flash lights or safety lanterns shall be used.

(Effective December 24, 1987)
