

Sec. 9-242a-11. Location of voting tabulator and voting booths

The entire polling area shall be in plain view of all election officials and electors waiting to vote. The voting tabulator and voting booths shall be placed, if possible, at least three feet from any wall, partition or guardrail and at least four feet from the checkers' table. The voting booth shall be so placed that no person outside the booth can determine how an individual voted. Each booth shall be equipped with a marking device approved by the manufacturer and a large card containing instructions for marking the ballot, supplied by the manufacturer and approved by the Secretary of the State. At least one voting booth in each voting district shall be accessible to persons with disabilities. The moderator, or another official designated by the moderator, shall regulate the flow of electors from the checkers table to the voting booth to the voting tabulator and out of the polling room.

(Adopted effective October 1, 1999; Amended March 27, 2008)
