

Sec. 20-196-14. Large animal veterinary medical facility

- (a) Surgery area should be a minimum of 20' × 20' with the ceiling sealed overhead, and constructed with impervious material to facilitate cleaning.
- (b) Surgical area should be dust free.
- (c) Holding pen size should be a minimum of 10' × 10' and should be covered, preferably.
- (d) Box stalls shall be covered and cleaned daily when in use.
- (e) Fly control shall be maintained.
- (f) Adequate storage facilities shall be provided.
- (g) Feed stuffs and bedding shall be maintained in a separate room in the hospital barn.
- (h) Adequate drainage for holding pens shall be provided.
- (i) Floors may be dirt or of impervious material, but must be kept clean and free of manure.
- (j) Recovery stalls must be padded, and should be a minimum of 10' × 10'.
- (k) Bovine chutes must be kept clean. (1) Solid waste shall be kept in a covered area and removed daily.

(Effective March 14, 1974)
