

**Sec. 28-27-6a. Physical and data security**

(a) All entrances to public safety answering points and private safety answering points shall be locked to prevent entry by unauthorized persons. Entry shall be gained only by authorized key holders or by lock release initiated by public or private safety answering point personnel.

(b) Nine-one-one workstations and equipment capable of receiving 9-1-1 calls shall not be connected to any device or network not specifically approved by the Division of Statewide Emergency Telecommunications.

(Effective November 13, 2019)
