

**Sec. 9-242-18. Hardware standards. Security. Voter access**

The punchcard or marksense voting system shall be designed and constructed so as to permit voter access to only those areas of the device used by the voter for the casting of votes. Additionally, the device shall be capable of being locked or otherwise secured so as to prevent voting at any time other than during voting hours in an election or when the system is being tested.

(Effective February 23, 1994)
