

Sec. 9-241-5. Hardware standards. Height

The ballot display shall be at a convenient height for the average voter and be adjustable so that it is easily reached by those voters confined to wheelchairs. The DRE voting system shall be designed and constructed to enable a voter in a wheelchair to reach all voting positions. The equipment shall allow moderators to place the voting device in a wheelchair accessible position with a minimum of effort and provide proper safeguards for the safety of the voter during operation in this position. The vote activator device shall be easily accessible to those voters confined to wheelchairs.

(Effective January 21, 1994)
